MDT Vision

An economic system that serves society and in which companies and other organisations make the maximum contribution to the common good. "Live well in a world where business is in accordance with ethical values".

MDT Mission

As a standards committee, we develop standards and guidelines that define and describe the common good in terms of the values and goals of the GWÖ movement. In this way we offer companies and other organisations orientation and inspiration to orient themselves towards the common good.

MDT Principles and rules

1. The MDT is independent - neither authorised nor subject to instructions.
2. The members of the MDT are qualified experts for their matrix topic.
3. The MDT makes the matrix documentation available to the movement.
4. The MDT integrates the matrix documentation into a revision process which takes into account the feedback of the movement.
5. The MDT organises the communication on the adaptations of the matrix (revision sequences).
6. The matrix is the instrument to measure the common good orientation of companies. With the Common Good report, the matrix presents the activities, effects and social benefits of the company in a clear, comprehensible and transparent manner.

MDT Tasks

1. The MDT meets 2 to 3 times a year
2. The standard should be formulated in such a way that reporting and auditing are easily possible; any tools required will be released by the MDT
3. We evaluate and publish assistance (instructions, tools, etc.) which simplifies reporting, auditing and monitoring of companies and other organisations.
